SKILLS

☐ <u>Technical Skills</u>

Programming Languages: C++,JAVA,

JavaScript, Kotlin, PHP

Web Development: React JS, Node JS, Express JS, HTML, CSS, SQL, Bootstrap. **Database**: MySQL, MongoDB, SQLite

Version Control System: Git.

IDEs: Eclipse, Visual Studio Code,

Android Studio

BALASOORIYAGE PULASTHI BUDDIKA

IT Undergraduate | Passionate about solving business problems using Software engineering

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

BSc (Hons) in Information Technology Specializing in Information Technology CGPA - 3.03

(Expected 2026)

• Lumbini College, Colombo 5

Technology Stream (Advanced Level)

2 B's, 1 C

(GCE A/L 2021/2022)

• Sri Subuthi National School, Batharamulla

Ordinary Level

5 A's, 4 B's

(GCE O/L 2018)

PROJECTS

 Web-based Service Supplier Management System (Technology: MERN Stack)

This web application was completed as a second-year university project with 8 members for a client

- This application was developed for a salon that also offers professional photography and event management services.
- The system streamlines daily operations for clients, salon staff, photographers, and system managers, offering eight essential functionalities.
- I developed a finance management system that handles budgeting, expense tracking, salary processing, inventory management, and financial reporting.

□ Soft Skills

Teamwork, Growth mindset, Good Listener, Flexibility, Fast learner

CERTIFICATION

Postman - Postman API Fundamentals Student Expert

Deploy Apps on Azure App Service-Microsoft Learn Student Ambassadors workshop

SPORTS

Football - player at school team

NON- RELATED REFEREES

Samantha Rajapaksha

Faculty Head/Senior Lecturer
Department of IT Faculty of Computing,
SLIIT

Phone: +94 71 412 1097 Email: samantha.r@sliit.lk

Sanjeeva Perera

Senior Academic Fellow Department of Computer Systems Engineering Faculty

of Computing, SLIIT Phone: +94 11 754 3938 Email: sanjeeva.p@sliit.lk • Implement admin authentication and Integrated finance data with other modules to ensure seamless information flow across the system.

• Student Management System (Technology : MERN Stack)

- This application was built to manage students in a classroom and make tasks easier for the lecturer.
- Lecturers can create, read, update, and delete Students records.

Web-based Tour Management System (Technology : JAVA)

This application was built to manage students in a classroom and make tasks easier for the lecturer.

- The system facilitates tourist and managers with four distinct functions.
- I designed and implemented the user management system, which handles CURD operation.

Notes Mobile Application (Technology : Kotlin)

- This app facilitates user to manage their daily tasks.
- User can operate CRUD features on user's notes.

• 2D-Game Mobile Application (Technology: Kotlin)

 This game application facilitates features such as shooting and flying game objects using tapping and swiping, with the added capability of saving high scores.

Event Management System (Technology: PHP,HTML,CSS,JS)

first-year 2nd semester university project with 4 members

• User authentication, user management and event management was the key features about this system.

I hereby certify that above details are true and accurate to the best of my knowledge.
